Total Specimens Submitted for Rabies Testing in 2018 to date: 15				

*RPEP = Rabies Post-Exposure Prophylaxis

Harmful Algal Blooms Continue this Summer

View all reports online at www.healthymadisoncounty.org

Harmful blue-green algae blooms continue to threaten lakes in the Central New York area including Madison County. Blooms can grow quickly in warm, shallow, stagnant surface water that gets a lot of sunlight. If you see an algae bloom, avoid it, and report it.

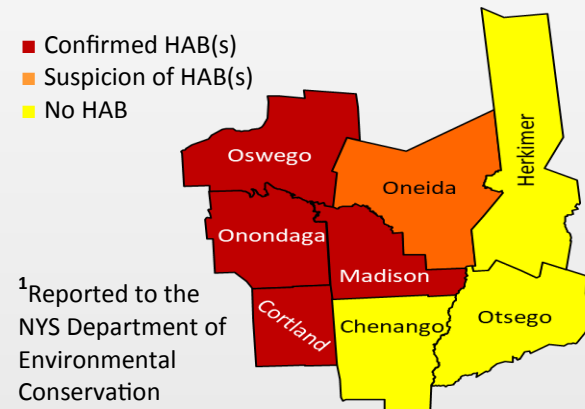

HABS are a health hazard and should be avoided when swimming, boating, or even just cooling off in waters with any algae. Figure 1 shows recently reported harmful algae blooms (HABs) by county. Counties in red detected one or more HABs within the month of July.

Report algae blooms to the New York State Department of Environmental Conservation (NYSDEC) at:
<http://www.dec.ny.gov/chemical/77118.html>.

View a list of reported algae blooms at: <http://www.dec.ny.gov/chemical/83310.html> or call Madison County Health Department at 315-366-2526.
