

Lead Safe Cleaning

(Three-bucket method)

Step 1: Soak a mop in cleaner and water in bucket #1. Scrub the area that needs to be cleaned with the mop.

Step 2: Squeeze the mop into an **empty** bucket #2.

Step 3: Rinse the mop in bucket #3 with clean water with NO cleaner.

Step 4: Keep mopping over the area as needed by repeating these steps.

Step 5: Flush ALL water down the toilet.

Reminder

Always:

- clean using wet methods and do not dry sweep in areas that may have lead dust.
- keep children away from the area that is being cleaned.
- clean mops and buckets after cleaning.
- wash your hands after cleaning.
- keep cleaning supplies out of the reach of children.
