

# Town of Stockbridge Water District Section

Stockbridge Water District – PWS ID# NY2602379

PO BOX 95 Munnsville NY 13409

## Introduction

Last year, our samples demonstrated that contaminants were below the levels allowed by the State. If you have any questions about this report or concerning your drinking water, please contact Alex Stepanski, Town Supervisor, at 315-495-6752 or Jim Chamberlain, Water Superintendent at 315-264-3617. We want you to be informed about your drinking water. If you want to learn more, please attend any of our regularly scheduled Town Board meetings the first Monday of each month.

### Water District Water Rates for Retail Customers

Residential Customers	
First 8,000 gallons.	\$48.00
Over 8,000 gallons	\$6.00 per 1000 gallons

## Where does our water come from?

The Town of Stockbridge purchases 100% of its water from the City of Oneida. Our water systems serve approximately 1,061 people through 724 service connections.

## Major Modifications

No Major modifications to the system were completed in 2020.

## Are there contaminants in our drinking water?

As the State regulations require, the City of Oneida routinely tests your drinking water total coliform and free chlorine as required. The table presented below depicts which compounds were detected in your drinking water.

Table of Detected Contaminants							
Contaminant	Violation Yes/No	Date of Sample	Level Detected (Average/Maximum) (Range)	Unit of Measurement	MCLG/ MRDLG	Regulatory Limit (MCL, MRDL, MRDLG, TT or AL)	Likely Source of Contamination
<b>Microbiological Contaminants – Sample Monthly</b>							
Chlorine Residual	No	Daily / Monthly	0.5 <sup>(1)</sup> (range = 0.1 – 1.1)	mg/L	N/A	MRDL = 4 <sup>(2)</sup>	Water additive used to control microbes.
Total Coliform	No	9/15/20, 10/20/20	1 positive sample <sup>(3)</sup>	N/A	0	MCL= 2 or more positive samples	Naturally present in the environment
<b>Disinfection By products – Stage 2</b>							
Stage 2 - Total Trihalomethanes (TTHMs) <sup>6</sup> (Stockbridge)	No	3,6,9,12/ 2020	64.1 <sup>(8)</sup> 23.6 – 82.7	µg/L	N/A	MCL = 80	By-product of drinking water disinfection needed to kill harmful organisms.
Stage 2 - Haloacetic Acids (HAA5) <sup>7</sup> (Stockbridge)	No		24.4 <sup>(8)</sup> 23.1 – 36.7		N/A	MCL = 60	
See City of Oneida AWQR for additional sample information - Physical Parameters, Radioactive Contaminants, Inorganic Contaminants, Synthetic Organic Contaminants, Principal Organic Contaminants, Lead and Copper							

- Notes:
- 1 – The levels presented represent the average and range of the levels reported on the microbiological sampling reports.
  - 2 – Value presented represents the Maximum Residual Disinfectant Level (MRDL) which is a level of disinfectant added for water treatment that may not be exceeded at the consumer’s tap without an unacceptable possibility of adverse health effects. MRDLs are currently not regulated but in the future they will be enforceable in the same manner as MCLs.
  - 3 – One positive sample was detected on each date listed. Repeat follow-up sampling was conducted and these samples did not detect Total Coliform, therefore MCL or TTT were not triggered.
  - 6 – TTHMs – chloroform, bromodichloromethane, dibromochloromethane and bromoform
  - 7 – HAA5 – mono-, di-, and trichloroacetic acid, and mono- and dibromoacetic acid
  - 8 – This level represents the highest Locational Running Annual Average (LRAA) and range of all sample results. Compliance with the MCL for Disinfection Byproducts is based upon the Locational Running Annual Average of all samples collected during four consecutive quarters. Individual samples may have exceeded the MCL but our system’s LRAA never exceeded the MCL.

## What does this information mean?

As you can see by the table, our system had no violations. We have learned through our testing that some contaminants have been detected; however, these contaminants were detected below the level allowed by the State.

## Is our water system meeting other rules that govern operations?

During 2020, our system was in compliance with applicable State drinking water operating, monitoring and reporting requirements.

## Closing

Please call Stockbridge Water Superintendent if you have questions at 315-264-3617 or Madison County Health at 315-366-2526.

**See Attached City of Oneida Report for additional required reporting, sampling, treatment**
