

Great Swamp Conservancy Trails

Most parts of the trail systems are mowed and groomed.

East Side Trail: 115 acre property that includes approximately four miles of flat trails that venture through both a wetland and forested habitat. This trail also features interpretive signage, picnic tables, and benches. This trail is seasonably wet, so boots are recommended. There is an early successional habitat management demonstration area in progress.

West Side Trail: Approximately 1.5 miles of flat, groomed trail that is seasonably wet. There is also a 900 foot boardwalk through the swamp. Benches offer a nice relaxing spot to observe the plentiful bird life, butterflies, dragonflies, listen to the amphibians, and see the Osprey platform.

Simpson Park Trail: Includes the Gorman Children's Fishing Area, is located on North Main Street about 1/4 mile south of the Nature Center. The 9-acre park has a handicap accessible fishing dock and a flat, groomed, easy walking perimeter trail around a wetland. This is a fantastic bird watching area.

GPS Coordinates (in Decimal Degrees)

West and East Side Trails: 43.119671 -75.788434

Simpson Park Trail: 43.116903 -75.785222
